Subject: Exide

Just attended a meeting to discuss Exide. In that meeting I mentioned our conversation yesterday about the Nevada smelter site that you are working on. DTSC is currently preparing information sheets for the Exide community and we thought that seeing anything that you sent out on your Nevada site would be very helpful.

I was asked to contact you and get the name of the person in your organization that could provide us that information. Would you please have your staff person contact Jim Marxen at the e-mail address shown above or call him at (916) 324-6544 so that Jim can tell him/her what he needs.

As always we are under a time crunch on this so if the person contacting Jim on this could call or send him a note today we would appreciate it very much.

Thanks again for your help - SB
